NORMAL HOURS:	8.45 am-5.06 pm with 45 min lunchbreak (or as negotiated)

THE INSTITUTE – PLACE OF WORK

The National Ageing Research Institute (NARI) is an independent, non-profit, medical research organisation recognised internationally as a centre of excellence in gerontology and geriatrics research. The Institute provides clinical, psycho-social, health services and public health research specifically directed at older people and also has a major focus on translational research. The mission of the Institute is to improve the life and health of older people through research into ageing.

POSITION SUMMARY

The position is based within the Director's Division of the Institute. The Research Officer/Fellow will work on projects within their Division, depending on the needs of the Division and the successful applicant's experience.

The key responsibility of this position is to deliver a training program for homecare workers as part of the Promoting Independence Through quality dementia Care at Home (PITCH) project, a project that aims to improve outcomes for people with dementia and their paid and family carers by co-developing and testing an evidence-based dementia specialist training program for community dementia care. The program has been designed based on a co-design process, and this role involves delivering the training program to home care workers, monitoring the fidelity of the intervention, and collaborating and liaising with the team. The education and training sessions will run approximately 12 times in Victoria and NSW plus top-up training for new staff.

The training program will be formally evaluated via a stepped-wedge cluster randomised controlled trial with our partner home care providers to investigate the program's impact on both care recipient outcomes (independence, wellbeing, and quality of life) and carer (both paid and unpaid) outcomes (burden of care, resilience and service satisfaction). The project also includes a health economic

evaluation to determine the cost effectiveness of the program including outcomes for the service organisations.

The position may also involve the development and implementation of educational resources across a range of NARI projects.

LINE MANAGEMENT

The position has a direct reporting relationship to the Division Director and Project Team Leader who will be responsible for day-to-day supervision.

KEY DUTIES

- Delivering education and training sessions (for the PITCH project, multiple times in Victoria and NSW), and providing top-up training for new staff as required
- Assist with recruitment and consent of home care workers, people with dementia, and family carers.
- Assist in organising forums, workshops, information sessions
- Assist with website design and maintenance.
- Development and implementation of educational resources/projects across a range of NARI projects
- Actively promote NARI's research in relevant areas through a variety of avenues
- Contribute to the overall development of the Division as an active member of the team, including participation in project development
- Participate in the professional development and staff development activities of the Institute as required. This includes liaison with relevant staff from other divisions
- Proposal development in collaboration with other NARI staff and/or external partners

QUALIFICATIONS

Essential

- Bachelor degree in a health-related field
- Experience in education/ training in health or aged care sector (e.g. as an clinical nurse educator)
